KEPERLUAN ANALISIS RISIKO PEROSAK (*PEST RISK ANALYSIS REQUIREMENTS*)

Selaras dengan **Akta Kuarantin Tumbuhan 1976**, **Peraturan-Peraturan Kuarantin Tumbuhan 1981** dan ***International Standards For Phytosanitary Measures (ISPM) No. 2 (Framework for pest risk analysis)*** dan ***11 (Pest risk analysis for quarantine pests, including analysis of environmental risks and living modified organisms)***; semua pengimportan, tumbuhan, produk tumbuhan dan artikel terkawal dalam keadaan di bawah akan terlebih dahulu dijalankan **Analisis Risiko Perosak (Pest Risk Analysis, PRA)** :

*In accordance with the **Plant Quarantine Act 1976**, **Plant Quarantine Regulations 1981** and **International Standards for Phytosanitary Measures (ISPM) No. 2 (Framework for pest risk analysis)** and **11 (Pest risk analysis for quarantine pests, including analysis of environmental risks and living modified organisms)**; all importation of plants, plant products and regulated articles under the following conditions required to undergo **Pest Risk Analysis (PRA)**:*

- i. Komoditi baru, yang belum pernah import dari mana-mana negara;
New commodities, which have never been imported from any country;
- ii. Pengimportan dari negara baru selain daripada negara yang telah dibenarkan pengimportan sebelumnya ;
Importation from new countries other than approved countries which already allowed importation previously;
- iii. Bentuk komoditi baru (bentuk pengimportan);
New commodity form (description form);
- iv. Semakan syarat-syarat pengimportan sedia ada apabila terdapat maklumat baru yang menunjukkan syarat-syarat pengimportan sedia ada tidak memenuhi keperluan *Sanitary & Phytosanitary (SPS)* negara;
Revision of existing import conditions following new information indicating that existing import conditions are not in compliance with the Sanitary & Phytosanitary (SPS) of the country;
- v. Terdapat pemintasan samada perosak kuarantin dan bukan kuarantin termasuk artikel terkawal dan lain-lain *contaminant* di pintu masuk - pengimportan daripada pengimport yang tidak mematuhi syarat-syarat pengimportan akan digantung sementara; atau;
Interception (either quarantine or non-quarantine pests) including regulated article(s) or other contaminant(s) at point of entry - the importation which do not comply with import requirements will be suspended temporarily;
or;
- vi. Terdapat laporan kemerebakkan perosak kuarantin di negara pengeksport - semua pengimportan konsainan tersebut dari negara pengeksport yang terlibat akan digantung serta-merta.
Credible reports of spreading of quarantine pests in the exporting country - all imported consignment(s) from the exporting country concerned will be suspended immediately.

Oleh yang demikian, bagi menentukan kelulusan sesuatu permohonan pengimportan, Jabatan Pertanian perlu mendapatkan **Teknikal Dokumen** termasuk senarai perosak dari **Pihak Berkuasa Kuarantin Negara Pengeksport (National Plant Protection Organization, NPPO)** untuk menjalankan PRA LENGKAP. Ini bertujuan untuk memastikan sesuatu pengimportan itu tidak membawa risiko kemasukan perosak asing berbahaya ke negara ini yang boleh menjejaskan sektor pertanian, perhutanan serta mengancam industri hiliran yang berpotensi eksport yang penting bagi pembangunan negara secara langsung atau tidak langsung.

Therefore, in determining an application for approval of importation, the Department of Agriculture Malaysia (DOA Malaysia) will request for technical documents, including a list of quarantine pests from Authority Exporting Countries (National Plant Protection Organisation, NPPO) for PRA evaluation. This is to ensure the importation does not carry any risks of harmful foreign pests into the country that could affect (directly or indirectly) local agriculture, forestry or threaten downstream industries with significant export potential for the development of the country.
